

Custom Control Upgrades

As your needs change, so should your crane controls.

With over 150 years of experience, Morgan is perfectly situated to design the control upgrade that will bridge the gap between your crane and your current needs. Our offerings include:

- **Control Modernization**
- **DC-AC Conversion**
- **Capacity Increase**
- **No Fly Zones**
- **PLC Upgrades**
- **HMI Upgrades**
- **Fully and Semi-Autonomous Positioning**
- **Anti-Collision Systems**
- **Below-the-Hook Interface**
- **Wi-Fi**

Even if we aren't the OEM, or your upgrades require a power conversion, our team can design, manufacture, and install all the necessary changes to upgrade your controls.

Morgan's control upgrades are designed with safety and ease of use in mind—leading to quick operator onboarding and safer operation and maintenance.

Align your controls with staffing, safety, and production needs.

Morgan has the expertise and ability to upgrade your current crane to the most up-to-date technologies and safety features available.

Contact your sales representative or call 330-823-6130 to schedule your control upgrade today.
